

DELIVERING SOLUTIONS ON TIME, ALL THE TIME

TVC develops innovative voice and SMS related applications for telecommunications companies, mobile phone operators, and a range of network users. We are dedicated to developing profitable partnerships that benefit our business partners, their customers, and ourselves. Understanding today's market imperatives, our approach is founded on fast, practical and creative responses, with the emphasis on user simplicity and cost effectiveness.

VOICE CHAT -ADDICTIVE AND FUN

TVC's Voice Chat application allows callers to use an anonymous premium rate virtual chat line – similar to instant messaging on the Internet – based on instantaneous exchange of voice messages. Hugely popular and highly addictive, Voice Chat connects callers within countries and around the globe.

A proven generator of strong and profitable revenues with low capital investment, Voice Chat is easily packaged and branded for a wide range of specialty communities and promotional events.

SYSTEM ARCHITECTURE

Our systems and applications are developed by leveraging “best-of-breed” strategic partnerships with industry leaders using client-server open architecture for maximum compatibility and scalability.

- Client-Server architecture
- E1 ISDN support
- MS Windows Operating System and MS SQL Database

FOR SUBSCRIBERS

Anonymous global or local chat on the ubiquitous phone

Addictive and fun

Browse for chat partners by gender

Block/Unblock chatters

A range of chatting options, including:

- Chat Zone - where they can chat with anyone who is on the line
- Mailbox Zone - where they can create a mailbox so that other chatters can leave messages for later retrieval
- Greeting Zone - where they can browse greetings and leave messages to chatters of their choice

Celebrity greetings and celebrity chat rooms

Special interest chat rooms – sports, music, movies etc.

FOR OPERATORS

New premium rate access to profitable youth markets

Vertical marketing opportunities to specialized communities of interest

Sticky service helps reduce churn

Proven strong and sustainable revenues

Low capital investment

Increase network utilization during off-peak hours
